

Business Structure:

Small, independent internet service provider based out of Neola, Iowa. This business was begun to provide high speed internet in our home initially. This expanded to neighbors and friends inquiring about receiving these services. We found a need and started the business of expanding to our rural Iowa areas.

History:

The business began with ideas in 2007 and in service by 2008. We began from our basement, advancing to the dining room table, then to our garage and finally we took up office space at the old city hall building in Neola, Iowa.
