

Demonstrated Experience-

Western Iowa Wireless has been in business since 2007. My wife, Shiloh Corrin and I started this business out of our home, we obtained our very 1st access point and provided internet to a handful of customers. Word of mouth helped to grow, what we thought would be a small business, in to something bigger than we imagined. We are now located at 105 3rd St. in Neola, IA.

From a handful of customers to over 4,100. From 1 access point to cover 1,000. From 2 employees to 11. We now provide-internet, telephone, and private camera systems for homes and farms. We have worked through every internet problem imaginable, I can assure anyone with great confidence, we have not nor will not stop until we take care of our valuable customers. Internet solutions due to flooding in Iowa and Nebraska has been very challenging this year, but as a team and along with very helpful community members, we have succeeded.

Community Partnerships, Services and Benefits to the Community-**Parks-**
